India stands on the cusp of a demographic transformation. The elderly in India currently comprise of **over 149 million** of the total population and is projected to double **by 2050 reaching to 320 million** due to increased life expectancy. The growing trend of nuclear families, there is an increased demand of Senior care services. This burgeoning segment not only underscores the challenges ahead but also illuminates vast opportunities for innovation and growth within the eldercare sector

Eldercare India Expo 2025 is a unique platform for businesses and innovators to showcase smart products, technology, innovations and sustainable solutions for this growing opportunity. The event is meticulously curated to serve as a comprehensive platform, bringing together Policy makers, industry leaders, healthcare professionals, caregivers, and families. The event focuses on quality healthcare solutions, technological advancements and adoptions, financial and legal security services and holistic lifestyle for silver population.
